

# Spa and wellness resort

Planning, design and installation of pre-fabricated elements on the construction site

Reference

Thermes de Saint Malo

Client

Thermes de Saint Malo, Groupe Raulic

Location

Saint Malo, France

Year

2015

Type of project  
**Renovation**

Cladding of beams, steam bath, round showers

wedi has been known to the installer for a long time, as they have previously worked with wedi on other projects. The quick and easy installation and the possible design variations are of great importance to them.

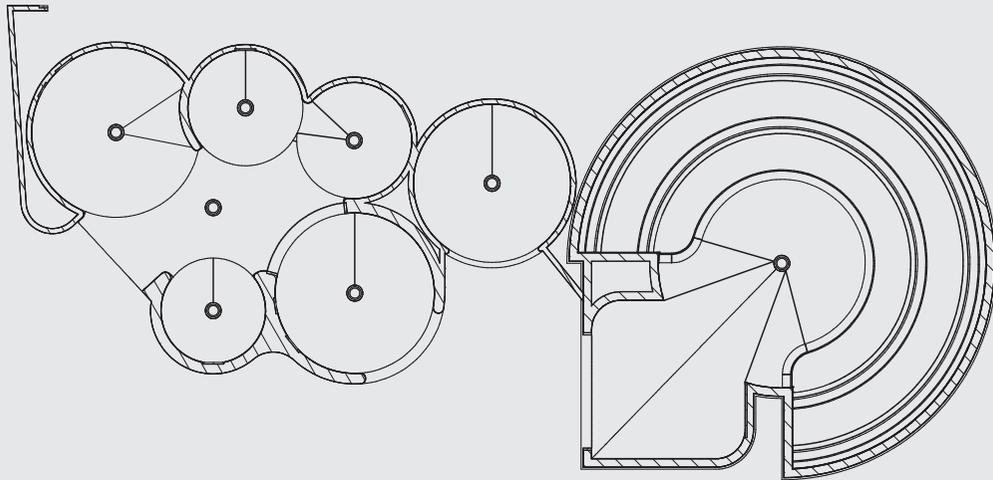

The construction site logistics were a particular challenge since this new unit is located in the basement with a very low ceiling height.

The client wanted round showers as well as a steam bath, directly attached to the Thalasso.

Architect Jean-Michel Labbe, Rennes

Client Thermes de Saint Malo

Installer Claude Chapel, Saint Malo

Brief description

## Thermes Marins de Saint-Malo

Saint Malo is a well-known seaside resort in Brittany. Thermes de Saint Malo has a hotel including restaurant and a Thalasso with direct access to the sea. The thermal bath has been there since 1963.
